Réunion Island, France (UTC+4)
Full remote

TECHNICAL SKILLS

FRONT-END
React, Next.js, TypeScript, Tailwind, Material UI

BACK-END
Node.js, Go, C# / .NET

API
GraphQL, REST

DATA
PostgreSQL, SQL Server, MongoDB, Prisma, sqlc

DEVOPS & CLOUD
Docker, CI/CD, Git, AWS S3, Vercel, Scaleway, CapRover, Azure DevOps

INTEGRATIONS
Stripe, Apple Pay, Google Pay, in-app purchases, Firebase, transactional e-mail & SMS

SYSTEMS
Linux, networking, security, monitoring

SOFT SKILLS

Autonomous, used to full remote
Product mindset
Initiative
Knowledge sharing
Agile collaboration (POs, designers)

LANGUAGES

French: native
English: professional working proficiency

INTERESTS

Video editing, football, volleyball, travel, cooking

Sébastien Legros

Senior Full-Stack Developer

Full-stack engineer with 6 years of software development, including 3 as technical lead. I design and ship products end to end on my own, from the database to the interface, and have worked fully remote for several years. React / Next.js, Node.js, Go, PostgreSQL.

EXPERIENCE

Software Developer
01/2026 – present

Willow · point-of-sale & business management software publisher · Permanent

- Development of .NET business applications for the company's products
- Design of back-end features (authentication, password reset, Azure services)
- Team workflow: code reviews and releases with Azure DevOps

C#, .NET, XAF / DevExpress, Blazor, SQL Server, Azure

Freelance Developer
02/2026 – present

Neitsa · sole proprietorship · clients in mainland France, Réunion and Mauritius

- New features, maintenance and production releases for a mortgage broker's CRM
- Design and redesign of websites for independent professionals

React, Next.js, Go, GraphQL, PostgreSQL

Full-Stack Developer, then Lead Developer
07/2021 – 07/2025

Squirrel · software development agency · Permanent · full remote

- Designed and built single-handedly, from database to UI, a supporting-documents collection module for a broker's CRM: rules engine, validation workflow, e-mail/SMS notifications, S3 storage, integration with a third-party business software API
- Architecture and design of GraphQL and REST APIs, PostgreSQL data modeling
- React front-end development (customer portals, back-offices, dashboards)
- Payment integration (Stripe, Apple Pay, Google Pay) and in-app purchases
- CI/CD, Docker, deployment and monitoring (Scaleway, CapRover)
- Agile collaboration with product owners and designers

React, Go, Node.js, GraphQL, PostgreSQL, MongoDB, Docker

Systems & Network Administrator
01/2017 – 07/2021

Réunion Regional Council · Saint-Denis

- Linux server administration: setup, security, monitoring
- Virtualized environments, LAN/WAN and VPN networks, Bash automation

Research Engineer
01/2016 – 01/2017

IRD (French National Research Institute for Development) · Saint-Denis

- Web (MERN) and mobile (Android) apps, REST APIs (Symfony, MySQL), IoT integration

RECENT PROJECTS

Mentora · online English learning platform. Teacher and student spaces, step-by-step session builder, results tracking, course material import and export.

Next.js, React, Node.js, TypeScript, Prisma, PostgreSQL, NextAuth

Preznt · preznt.gifts · interactive digital gift platform. Passwordless code sign-in, Stripe payments with webhooks, push notifications, 3D scenes.

Next.js 16, React 19, Node.js, PostgreSQL, Stripe, Three.js

EDUCATION

Master's-level Engineering Degree, Computer Science & Telecommunications · ESIROI · 2012 – 2015

Two-year Technical Degree (DUT), Networks & Telecommunications · IUT Saint-Pierre · 2010 – 2012
